RDRTec performs innovative radar research and development for the U.S. Government and its prime contractors

RDRTec collaborates with top tiered U.S. government contractors who transition RDRTec's innovative solutions from research and development to integration on key existing platforms

RDRTec provides innovative technology and creative solutions for radar system design and radar systems engineering. Our specialty is the full exploitation of radar sensor data.

Our capabilities and experience include:

- ASW, ASUW, SAR, GMTI, and related fields
- Development of coherent processing algorithms to extract meaningful and useful information from s
- Development of non-coherent processing techniques
- Development of Sense and Avoid technology
- Analysis and evaluation of radar sensor data

RDR Tec is a privately owned Texas based corporation and is classified as a veteran owned small business
